

# RENAUD LIBER

Data analyst & BI developer/manager with 10+ years experience throughout several industries in cross-functional roles and multinational environments. I had the opportunity to work with companies that were at different development stage (from start-up to established leaders).

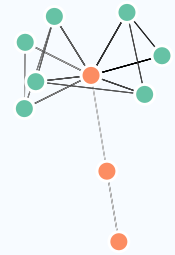

I help organisations thrive thanks to better understanding of their data, solid reporting structure and actionable business insights.

Below are some of the elements I focus on to drive impactful analytics :

- Manage and Coach team of Data Scientists / Analysts
- Audit data & partner with data engineers to ensure data flow quality
- Design and deploy self-service dashboard to enable the management team
- Help the business leverage predictive analytics with use of machine learning
- Tailor analysis/presentation to provide management actionable insights
- Ensure that from insights actions are taken and monitored to impact the bottom line
